Break (10:15 - 10:30) Lunch (11:55 - 13:30) Break (14:45 - 14:55)

Important Information for those about to take their assessments

This is preparation for a time when exams become more serious – we are getting you into good habits.

Before the Assessments:

- Check your equipment
 1. Pencil case (named)
 2. Reliable pen and spare
 3. Sharp pencils/coloured pencils
 4. Ruler, highlighter and eraser
 5. Mathematical instruments: protractor, pair of compasses, calculator if required

During the Assessments:

- **TAKE** into the assessment room the equipment listed above, as appropriate.
- **DO NOT take in mobile telephones or portable electronic music devices.**
- **DO NOT take in BOOKS or FILES, nor calculators and electronic watches unless specially allowed.**
- **SILENCE** during examination time. This includes the time when papers are being given out and collected in afterwards.
- **PRESENTATION and METHOD**
 1. Head your paper with your name, form (and set, if appropriate).
 2. Presentation is important. Try your best.
 3. Take plenty of SPACE over each question. Sometimes you are asked to write on alternate lines anyway. If you cannot do a question at first, write down the number, leave space - and try to return to the question later.
 4. Read each question carefully. If there are choices, choose with care. It is wise to plan essays/answers in outline.
 5. PACE. Watch the time but do not rush. Papers are designed to give you time to read them properly and to check your script at the end.
 6. If you make a mistake, cross out neatly with a single line. Insert corrections or afterthoughts clearly.

7. Check that your NAME is on every sheet that you hand in.
Make sure you hand in every sheet.

After the Assessments:

- Remember: **SILENCE** until you have left the assessment room.
