

Dear Fourth Form Parents and Guardians,

### **Fourth Form Unifrog Launch**

This week we have been rolling out Unifrog to the Fourth Form.

Unifrog is a destinations platform used by the school to help boys with their career-planning. Unifrog helps students to explore their career interests, and as they move up the school they will use the tools on Unifrog to help them research and follow their chosen career path. Unifrog allows students to compare every university course and apprenticeship in the UK, as well as university courses in 30 other countries across the world. It also provides access to Labour Market Information and advice on careers and subjects for all routes. Other features include a CV builder, personality quiz, and access to online courses.

All boys should have received an email from Unifrog with login instructions. Please could you ensure that your son has activated his account and completes the Interests Profile by Friday 19 February. We would also encourage them to explore the platform and familiarise themselves with the various tools over half term, in particular the Activities and Competencies tools. Getting to grips with Unifrog now will stand them in good stead when they start looking at their career options in more depth.

If you have any queries, then please let me know.

Kind regards,

**Mrs E Fox-Johnson**  
Careers Adviser
